OBJECTIVE

Aspiring Java Software Developer with a strong foundation in Java and web development. Experienced in building AI-powered applications using ChatGPT, Gemini, Claude, Framer AI, Figma AI, and Rocket.new through effective prompt engineering and AI-assisted development. Passionate about writing clean, efficient code, solving real-world problems, and continuously learning emerging AI technologies to build innovative software solutions.

SKILLS

Primary language:

Java : Core Java, Object-Oriented Programming (OOP), Collections Framework, Exception Handling, JDBC.

HTML, CSS & JavaScript : Developed responsive web interfaces in Recipe Finder App and during internship at 8 Queens Pvt. Ltd

PHP & SQL : Built a web platform with backend logic and database management for my final year project EDU CITY

Generative AI & Developer Tools:

- **ChatGPT** – Prompt Engineering, AI-Assisted Development & Content Generation
- **Writesonic** – AI Content Generation
- **Midjourney** – AI Image Generation & Creative Design
- **Figma** – UI/UX Design & Prototyping
- **Rocket.new** – AI-Assisted Web Application Development
- **Claude** – Code Assistance, Debugging & Development Support

INTERNSHIP

8 Queen's Pvt.Ltd

Duration: one month

- Gained practical exposure to front-end and back-end development during a one month internship at 8 Queens Pvt. Ltd.
- Developed the Recipe Finder App using HTML and CSS as a responsive web interface for browsing recipes.
- Worked with PHP and MySQL for web application tasks including developing testing and maintaining application features.
- Assisted in building structured layouts and user friendly interface design with a focus on clean code and consistent styling.

PROJECTS

JOE HANDBAG STORE – ADMIN MANAGEMENT SYSTEM

Technologies: React.js, HTML, CSS, JavaScript, Java Spring Boot, MySQL

- Developed a full-stack handbag inventory management system with an admin dashboard.
- Implemented CRUD operations for managing handbag products using React.js and Spring Boot.
- Designed and integrated a MySQL database for efficient product data management.
- Built RESTful APIs to connect the frontend and backend for seamless data handling.
- Used GitHub for version control and ChatGPT for debugging and code optimization.

CLINIC APPOINTMENT MANAGEMENT SYSTEM

Technologies: Core Java, JDBC, MySQL

- Developed a Java-based console application for clinic appointment management using role-based access control.
- Implemented Admin, Doctor, and Patient modules for managing doctors, booking appointments, approving/rejecting requests, and tracking appointment status.
- Integrated JDBC with MySQL to perform CRUD operations and efficiently manage doctor, patient, and appointment records.
- Used ChatGPT for code generation and debugging through prompt engineering.

CERTIFICATIONS

- Java Full Stack Development -Completed a Java Full Stack Development course, gaining hands-on knowledge of Core Java,Front-end Technologies
- ZOHO Young Creator Program - Gained hands on experience in building applications using low code, Deluge script and workflow automation

EDUCATION

2023-2026

Information Technology

Women's Christian College
Information Technology
Percentage: 91%

Information Technology graduate with strong expertise in programming, data structures, and database management. Proven ability to apply technical skills through academic and project-based work.

2021-2023

Higher Secondary School

St. Mary's Higher Secondary
Percentage: 89.91%

Served as Class Representative, acting as a communication link between students and faculty. Demonstrated leadership, responsibility, and coordination skills while supporting academic and class-related activities

LANGUAGE PROFICIENCY

- Tamil: Native proficiency (Read, Write, Speak)
- English: Fluent proficiency (Read, Write, Speak)
