OBJECTIVE

Aspiring Java Developer with strong knowledge of Core Java, OOP, JDBC, SQL, Spring Boot, and REST APIs. Passionate about developing scalable backend applications, solving programming problems, and continuously learning modern Java technologies. Seeking an entry-level Java Developer opportunity to contribute and grow professionally.

SKILLS

Programming Languages :

Java : Core Java, Object-Oriented Programming (OOP), Collections Framework, Exception Handling, JDBC.

SQL : Built a web platform with backend logic and database management for my final year project EDU CITY

Backend :

Spring Boot: Developed a full-stack handbag inventory management system with RESTful APIs, implementing CRUD operations and integrating a MySQL database using Spring Boot.

JDBC: Developed a Java-based Clinic Appointment Management System using JDBC and MySQL, implementing CRUD operations and role-based modules for Admin, Doctor, and Patient.

Frontend :

HTML, CSS & JavaScript : Developed responsive web interfaces in Recipe Finder App and during internship at 8 Queens Pvt. Ltd

React.js: Developed the frontend of the JOE Handbag Store using React.js, implementing CRUD functionality and integrating with Spring Boot REST APIs.

Database :

MySQL: Designed and managed relational databases for the Clinic Appointment Management System and JOE Handbag Store, implementing CRUD operations and SQL queries for efficient data management.

Developer Tools :

- Git
- GitHub
- IntelliJ IDEA
- Visual Studio Code (VS Code)
- XAMPP
- Maven

AI & Design Tools

- ChatGPT
- Claude
- Figma
- Writesonic
- Midjourney
- Copilot

INTERNSHIP

8 Queen's Pvt.Ltd

Duration: one month

- Gained practical exposure to front-end and back-end development during a one month internship at 8 Queens Pvt. Ltd.
- Developed the Recipe Finder App using HTML and CSS as a responsive web interface for browsing recipes.

PROJECTS

JOE HANDBAG STORE – ADMIN MANAGEMENT SYSTEM

Technologies: React.js, HTML, CSS, JavaScript, Java Spring Boot, MySQL

- Developed a full-stack handbag inventory management system with an admin dashboard.
- Implemented CRUD operations for managing handbag products using React.js and Spring Boot.
- Designed and integrated a MySQL database for efficient product data management.
- Built RESTful APIs to connect the frontend and backend for seamless data handling.
- Used GitHub for version control and ChatGPT for debugging and code optimization.

CLINIC APPOINTMENT MANAGEMENT SYSTEM

Technologies: Core Java, JDBC, MySQL

- Developed a Java-based console application for clinic appointment management using role-based access control.
- Implemented Admin, Doctor, and Patient modules for managing doctors, booking appointments, approving/rejecting requests, and tracking appointment status.
- Integrated JDBC with MySQL to perform CRUD operations and efficiently manage doctor, patient, and appointment records.
- Used ChatGPT for code generation and debugging through prompt engineering.

CERTIFICATIONS

- Java Full Stack Development -Completed a Java Full Stack Development course, gaining hands-on knowledge of Core Java,Front-end Technologies
- ZOHO Young Creator Program - Gained hands on experience in building applications using low code, Deluge script and workflow automation

EDUCATION

2023-2026

Women's Christian College
Information Technology
Percentage: 91%

Information Technology

Information Technology graduate with strong expertise in programming, data structures, and database management. Proven ability to apply technical skills through academic and project-based work.

2021-2023

St. Mary's Higher Secondary
Percentage: 89.91%

Higher Secondary School

Served as Class Representative, acting as a communication link between students and faculty. Demonstrated leadership, responsibility, and coordination skills while supporting academic and class-related activities

LANGUAGE PROFICIENCY

- English: Fluent proficiency (Read, Write, Speak)
- Tamil: Native proficiency (Read, Write, Speak)
